For Immediate Release

Pixelmetrix DVStation-Mini TSP Offers Comprehensive Transport Stream Analysis in Self-Contained, Portable Unit

Compact device offers web browser and VNC sessions in lightweight box costing less than US$6,000*

NAB Las Vegas, April 14, 2008 – Pixelmetrix, the global expert in Preventive Monitoring for digital television and IPTV networks, is launching the DVStation-Mini TSP, a portable transport stream analyzer that also provides test, measurement and monitoring, priced under US$6,000, at Booth SU12105.

DVStation-Mini TSP has a single test input of ASI or SMPTE-310 and can be used as a portable test device with easy to carry handle, or as a single RU rack-mounted unit. Signals can be monitored over a LAN or Internet connection using a simple web browser (supporting Mac and PC) or VNC remote user interface, which supports up to four users plus a shared mode for collaboration with others.

Target applications are DTV compliance testing for terrestrial broadcasting, cable headend testing and compliance, and satellite uplink contribution and distribution.

"Although the DVStation-Mini is ideal for cable, satellite and broadcasters, it is especially essential for American broadcasters in the final phases of converting to digital broadcasting," said Phil Dubs, Vice President, Sales, North America. "It is vital for broadcasters to test the compliance of their signal before it is aired. The DVStation-Mini makes a brilliant device for testing the station output to ensure that the digital signal meet all the quality and integrity standards."

Measuring 13.5 by 1.5 inches and weighing only 5.7 pounds, the DVStation-Mini offers a full suite of transport stream analysis and monitoring tools – displaying video thumbnails and critical audio and video parameters in a concise and clear format. A simple user interface minimizes the learning curve, while its robust software allows users to drill down to examine errors.

Using the same Emmy® award winning technology as the full size DVStation, the DVStation-Mini is based on the Linux operating system, ensuring long term stability. It also supports DVB, ATSC and Digicipher® protocols for extreme flexibility.

The unit features a shock-mounted internal hard drive that withstands hard mobile use and supplied programmable GPIs and SNMP for integration with large Network Management Systems.

The DVStation-Mini is also available as a PSK model, featuring an L-band input.

Highlights at the booth include Pixelmetrix end-to-end monitoring solutions and emerging video over IP transmission monitoring solutions featuring the Emmy® Award winning DVStation-210, Electronic Couch Potato™ (ECP) and ECP Consolidator™, DVStation-Remote, DVStation-IP^3, DVStorIP-Gen, DVStor, DVProbe-C, VISUALmpeg Qualify, ATSC Transport Stream Compliance Verification software and DVB-S.2 ASLF.

Pixelmetrix develops a host of IPTV and Preventive Monitoring systems that offer unique attributes and versatility, allowing operators to achieve end-to-end visibility and keep tabs on their network architecture.

The NAB exhibition will be held from April 14 to 17 at the Las Vegas Convention Center, Las Vegas, Nevada, USA.

Special offer of US$5,995 at NAB 2008 only

About DVStation Products

The Emmy® award winning DVStation product family by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP^3, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP-Gen and DVProbe-C.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television and IPTV networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service and quality of experience. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutura, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+, Towercast, AT&T, Verizon, Telus, NTT and more.

Pixelmetrix has been conferred the Engineering & Technology Emmy® Award 2007, TV Technology publication STAR Awards (Superior Technology Award Recipient) 2000, 2004 and 2007, BIRTV Product of the Year Award 2006, Broadcast Engineering publication Pick Hit Award 2005, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, as well as the Peter Wayne Award 2000, for Best Design and Innovation.

The terms Preventive Monitoring, DVStation, DVStation-Mini, DVStation-Remote, DVStation-Pod, DVStation-IP^3, DVStor, DVStorIP-Gen, DVShift, DVProbe-C, DPI Auditor, EndGame, Electronic Couch Potato, ECP Consolidator, VISUALmpeg and VISUALmpeg Qualify are trademarks of Pixelmetrix Corporation.
