For Immediate Release

### **Pixelmetrix announces a major sale of DVStation-Family Monitoring Systems to their UK distributor Digi-Box.**

**IBC 2002, Amsterdam, booth 2.318** – Following rave reviews from visitors to the stand at IBC, Pixelmetrix received the order from Digi-Box for ten DVStation-Pods and DVStation-Remotes for immediate delivery to prominent UK customers.

Pixelmetrix augmented its flagship DVStation™ product at IBC with new form factors adding portability while maintaining its uncompromised performance. DVStation-Remote and DVStation-Pod provide an economical way for operators, Systems Integrators, Integration Engineers and Maintenance Engineers to monitor digital television networks without resorting to expensive R&D equipment. The Digi-Box deal includes multiple DVStation-Pods which cover COFDM, QPSK, ASI, and ATM physical transport technologies.

“The customer feedback is clear. The cross platform compatibility between the DVStation-Pod and the flagship DVStation™ high-end modular system is a compelling solution at an affordable price. We are committed to offer market leading technology”, commented Jon Philips, Managing Director of Digi-Box. “Pixelmetrix have again illustrated their ability to produce MPEG solutions that meet the current and future market requirements”.

“The launch of DVStation-Pod and DVStation-Remote at IBC has not only generated overwhelming interest and excitement from our existing customer base but has also opened many new areas - including installation and integration of DVB applications.” Said Reto Brader Europe-Middle East-Africa General (EMEA) Manager for Pixelmetrix.

## **About Digi-Box**

Digi-Box distributes for several leading manufactures in the UK and Europe. Their product portfolio includes Test and Measurement equipment, Digital Interfaces, Signal Processing products and Routing Switchers.

## **About DVStation Products**

DVStation, DVStation-Remote and DVStation-Pod by Pixelmetrix are award-winning systems for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager. If signal and content integrity is essential for business success, DVStation is the most advanced Preventative Monitoring solution available today.

## **About Pixelmetrix Corporation**

Pixelmetrix Corporation is the global expert in Preventative Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe. Pixelmetrix customers include CNN, CBS, Disney, HBO, Japan Telecom, KPBS, NTL, Sky PerfectTV! Japan, British Telecom, Canal+ and Télédiffusion de France. It is the winner of the Peter Wayne Award for Best Design and Innovation IBC 2000, and Winner of the STAR 2000 Superior Technology Award from TV Technology Magazine.
