For Immediate Release

Pixelmetrix rolls out its latest IPTV
test and monitor offerings at TelcoTV 2006

TelcoTV, Dallas, Booth 101, November 3, 2006 - Pixelmetrix, the global expert in Preventive Monitoring for digital television networks, will exhibit its latest array of IPTV service validation tools at TelcoTV 2006. Highlights include the DVStorIP-Gen for IPTV Stress Testing and DVStation-IP for IPTV Quality of Service monitoring.

The DVStorIP-Gen is a high-performance, cost-effective tool for the evaluation, compliance testing and verification of networks, monitoring and equipment analysis. It supports SPTS and MPTS generation, including UDP and RTP streaming. Each generated transport stream can be forwarded to up to 100 target IP destinations, identified by the IP address and port number. The DVStor can also generate up to seven unique transport streams simultaneously, and up to 900Mbps of IPTV traffic, making it an efficient solution for IPTV broadcasters as well as test and monitoring equipment and network providers. With the DVStorIP-Gen, operators can observe error-free streaming through the restamping of continuity count and insertion of PCR discontinuity flag during transport stream loopback.

The DVStation-IP is a sleek, feature-rich system that provides MPEG-2 transport stream analysis and monitoring over an IP connection via a 10, 100 and 1000Mbps Ethernet port. It offers remote control and automation platform - ideal for operators requiring the transmission of video and data over Internet or other IP networks. Live Video Display that allows visual confirmation of program content presence, Service View that spans multiple TS, displays MPEG-2 and H.264 video thumbnails, critical TS and audio/video parameters in a concise format, as well as IP input payload capability of up to 500Mbps are some of its key features. A combination of real-time signal measurements and user-configurable alarm thresholds are also integrated.

Danny Wilson, President and CEO of Pixelmetrix Corporation shared, "Our portfolio of end-to-end IPTV test and monitoring systems serves to facilitate the efficacy of 'always on' converged IP network architectures and the ever-expanding multitude of services including real-time VoD, PPV, IPG, N-PVR and so on. In line with the rapid emergence and deployment of IPTV systems, Pixelmetrix performance devices offer broadcasters, cable and satellite operators, content and network providers a distinct edge in optimizing their IPTV service delivery."

TelcoTV will be held in Dallas, Texas, for three days starting November 6, 2006.

About DVStation Products

The award-winning DVStation family of products by Pixelmetrix is used for monitoring the quality and performance of digital networks. DVStation is the only all-in-one solution that can monitor a signal path from studio to home. The operator sets the monitoring thresholds and alert methods for the entire network from a single location. DVStation will notify operators if there's trouble, with alerts delivered remotely over a corporate LAN, the Internet or even to a pager.

DVStation is the most advanced Preventive Monitoring solution available today. When signal and content integrity is essential for business success, DVStation is the only logical solution.

The DVStation family is available as DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVShift, DVShift-HD, DVStor, DVStorIP and DVStorIP-Gen.

About Pixelmetrix Corporation

Pixelmetrix Corporation is the global expert in Preventive Monitoring for digital television networks. The company provides equipment and network intelligence systems to television broadcasters for the management and monitoring of quality of service. Headquartered in Singapore, Pixelmetrix has offices in the United States and Europe.

Pixelmetrix clientele include CNN/Turner Networks, Viacom, Fox, CBS, ESPN, Disney, Univision, Telefutura, USDTV, HBO, NHK, Japan Telecom, KPBS, NTL, Sky PerfecTV! Japan, British Telecom, Canal+ and Télédiffusion de France.

Pixelmetrix has been conferred the Peter Wayne Award for Best Design and Innovation IBC 2000, the STAR 2000 and 2004 Superior Technology Awards from TV Technology Magazine, Cable-Satellite/Mediacast Product of the Year Awards 2003 and 2004, Broadcast Engineering publication Pick Hit Award 2005 as well as the BIRTV Product of the Year Award 2006.

The terms Preventive Monitoring, DVStation, DVStation-Remote, DVStation-Pod, DVStation-IP, DVStation Mini, DVStor, DVStorIP, DVStorIP-Gen, DVShift, DPI Auditor and VISUALmpeg are trademarks of Pixelmetrix Corporation.
